Theme

Reimagining & Rebuilding K-12 Education

For  
**SCHOOL LEADERS  
& TEACHERS**

Conference Chairperson  
**DR. HARISH CHAUDHRY**

A quarter century into the 21st century, the world of education is still debating the content, scope and methodology of imbuing 21st century skill in children. It is clear that the era of information as the primary purpose of education is over. Also, there seems to be a reasonable agreement amongst educators on the components of 21st century skills. Curriculum design in line with the policies and mandated syllabi is an extremely challenging task. Add to it NEP and CUET and the task seems even more daunting. The regressive impact of Covid-19 and the urgent need to get back on rails calls for careful planning and implementation.

Have we put Covid-19 behind us? Maybe, yes, we don't know for sure. It disrupted the world, each and every sphere of life, but perhaps the impact was the most devastating on the educational systems. The manner and speed with which the schools faced the challenge and creatively designed and implemented a completely new and novel method of education was remarkable. However, its efficacy left a lot to be desired.

Online education has its severe limitations but also some advantages. However, most schools shifted (or were forced to do so) from offline to online at the onset of Covid-19 and are now shifting back to offline mode now. Should we explore a hybrid mode and take the advantages of online education or not is not the question. The question facing us is identifying the strengths of the online approach and integrating it in our pedagogy. The impact of Covid-19 was felt very differently by different schools. The disruption both redefined the school systems as well as threw up new challenges.

This three day conference shall deliberate on these issues and share views, experiences and approaches to resolving them. We invite you to be a part of this deliberation and contribute from your rich experience with educators from India and abroad.
