

Memorandum of Understanding
between
National Institute of Technology Agartala
and
Indian Institute of Technology Delhi

National Institute of Technology Agartala (NITA) and Indian Institute of Technology Delhi (IITD) has agreed to the following protocols governing their collaboration on academic activities.

Scope

The scope of collaboration on academic activities in this Memorandum of Understanding is for providing an opportunity to students currently pursuing Bachelor of Technology (B.Tech.) and Dual Degree (Integrated B.Tech. and M.Tech.), to explore the option of semester-long internship (project) and undertake courses in IITD and be considered for early admission to the PhD programme at IITD. It is expected that this collaboration will in due course lead to collaborative research projects, joint supervision of PhD students, joint workshops and seminars, etc.

Scheme for Early Selection of meritorious NITA students to PhD Programme

This scheme is intended to enable meritorious NITA B.Tech. and dual degree M.Tech. students to carry out part of their studies including project work at IITD and offer an opportunity for direct admission to PhD without the need to qualify GATE or any other national level examination. This will enable "early admission" to PhD for NITA B.Tech. students as early as the end of their 7th semester, and Dual Degree students as early as the end of their 9th semester (after they have completed at least a semester of coursework and project at IITD). It is envisaged that this scheme will also help NITA students to enhance their chances for qualifying for the PMRF fellowship for PhD at IITD.

Scheme Details

1. Under this scheme, NITA students who have a CGPA of 8.00 at the end of their sixth semester (three years), will be eligible to apply for a project in summer and complete their fourth year (7th and 8th semesters, or either), at IITD, and then be considered for an early admission into the PhD program at IITD. Dual Degree students from NITA would be eligible to apply after their 8th semester, for a project in summer, or complete their fifth year (9th and 10th semesters, or either), at IITD, and then be considered for an early admission into the PhD program at IITD.
2. There will be two points at which the student can apply, either before the month of May each year (just after the completion of their 6th semester), and before the month of December each year (just after the completion of their 7th semester). Correspondingly, this would be at the end of 8th and 9th semester, respectively, for students in the Dual Degree program.
3. Students applying before the month of May would be expected to spend the summer plus the 7th (or 9th) semester in IITD (which usually spans from late July to the end of November), while students applying before December would be expected to spend their 8th (or 10th) semester in IITD (which usually spans from late December to early May).
4. All applications will be received through a portal set up for this purpose. They will submit their transcript, and other academic records and achievements, and documentary evidence of any research or internship experience. Upon selection, the students will have a *provisional* offer of admission to the PhD program. This could be after the completion of the 6th or 7th semester of B. Tech. (or after 8th and 9th semester, respectively, for students in the Dual Degree program). This provisional offer will clearly state that the final offer of admission will follow provided they demonstrate sufficient merit in coursework and/or research during their stay in IITD. The final confirmation of this offer will be done through a selection committee set up for the purpose, whose decision will be significantly influenced by (but not limited to), the performance of the student in coursework and project conducted at IITD.

Handwritten signature in blue ink.

12. As part of this program, students can have the following academic windows at IITD:

- (i) Summer (after 6th semester) plus 7th semester (summer after 8th semester plus 9th semester, for Dual Degree);
- (ii) Only 7th semester (9th semester for Dual Degree);
- (iii) Only 8th semester (10th semester for Dual Degree);
- (iv) Summer (after 6th semester) plus 7th and 8th semesters (summer after 8th semester plus 9th and 10th semesters, for Dual Degree);
- (v) 7th and 8th semesters (9th and 10th semesters, for Dual Degree).

Commencement, renewal, termination and amendment

This MoU will come into force upon affixing of the signatures of the representatives of the partner institutions and will remain in effect for five years. This MoU may be renewed upon its expiry, with the agreement of both the partner institutions. If either partner institution wishes to terminate the MoU at the end of five years, it must notify the other institution not less than six months prior to the expiry of the MoU.

This MoU or its renewal and the actions taken under it may be reviewed at any time. Modifications may be made by mutual agreement and any amendment or extension to the agreement may be formalized by the exchange of letters between the two parties.
